Professional Summary

Senior Software Developer with 4+ years building multi-tenant logistics SaaS across frontend applications, backend services, and cloud delivery. Experience with React, Angular, TypeScript, Node.js, Ruby on Rails, AWS, and Azure. Own WMS configuration delivery, code review, and mentoring, with hands-on work in automated release gates, tenant-isolated integrations, and an LLM configuration agent deployed to internal pilot.

Experience

Anchanto India **June 2022 – Present**
Senior Software Developer

- Designed and implemented **Jenkins CI/CD for AWS Amplify**, with automated unit tests, lint gates, branch-based promotion across QA/UAT/production, and build-health alerts; replaced manual build-artifact commits with repeatable, auditable releases.
- Built an **end-to-end camera integration** for a multi-tenant WMS, connecting Angular browser capture through the MediaDevices API to secure pre-signed **AWS S3 uploads**; maintained tenant isolation and enabled visual evidence for compliance and security audits.
- Built and deployed an **LLM-powered configuration agent in internal pilot**, translating natural-language warehouse operations into **750+ settings** across tenant, warehouse, and company levels, with human review and versioned rollback.
- Led evaluation and prototyping of a **CrewAI automation agent** for Jira ticket-to-code traceability and cross-team impact analysis, reducing developer triage effort by **30%** and accelerating sprint planning.
- Architected a **React and TypeScript** warehouse layout and path visualizer using graph algorithms and drag-and-drop interaction, reducing planning time by **40%** and improving operational efficiency by **25%**.

Anchanto India **March 2022 – April 2022**
Software Development Intern

- Set up **CI/CD pipelines** for AWS-hosted QA and UAT environments, improving deployment efficiency by **30%**.

PricewaterhouseCoopers (PwC) India **June 2021 – August 2021**
Technology Consultant Intern

- Built an **Azure voice sentiment analysis system** integrating Twilio APIs with Microsoft Dynamics CRM, automating feedback insights and reducing manual tagging by **30%**.
- Implemented a serverless pipeline using **Azure Functions, Cognitive Services (Python SDK)**, PowerApps, and Blob Storage.

Technical Skills

Languages: JavaScript, TypeScript, Python, Ruby, SQL
Backend and Systems: Node.js, Ruby on Rails, REST APIs, WebSockets, multi-tenant architecture, distributed systems
Cloud and Delivery: AWS (EC2, S3, Amplify, IAM), Azure (Functions, Blob Storage, Cognitive Services), Jenkins, CI/CD, Git, Linux
Frontend: React, Angular, Next.js, Redux, HTML/CSS, Tailwind CSS
AI and Engineering: CrewAI, LLM automation, human-in-the-loop workflows, code review, release management, system design, design patterns, data structures and algorithms

Education

IIEST Shibpur August 2018 – July 2022
Bachelor of Technology in Information Technology CGPA: 8.98

Achievements

Solved **1000+ DSA problems** across LeetCode, Codeforces, and HackerRank; **top 10% globally** in Google Kick Start Round H; runner-up, Hyland Hackathon 2021 (20+ teams).
